Reported year window

Made with Julius

The catalog is movie-led, with a short-series TV profile

69.6%

Movies

6,131 of 8,807 titles

67.0%

One-season TV shows

1,793 of 2,676 shows

60.9%

TV-MA or TV-14

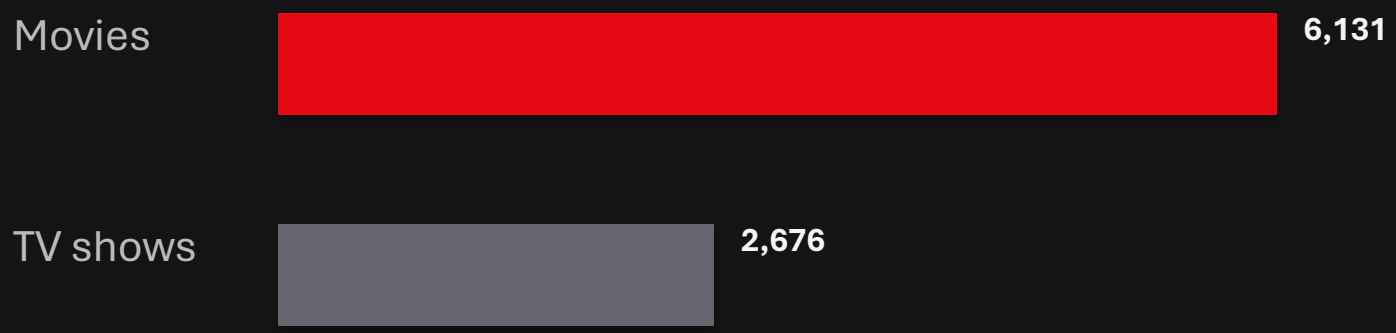

5,367 of 8,807 titles

Main takeaways

- Movies account for more than two-thirds of reported titles.
- Most TV shows have only one season recorded.
- Data quality limits year-based and content-safety conclusions.

Made with Julius

Movies represent nearly 70% of reported titles

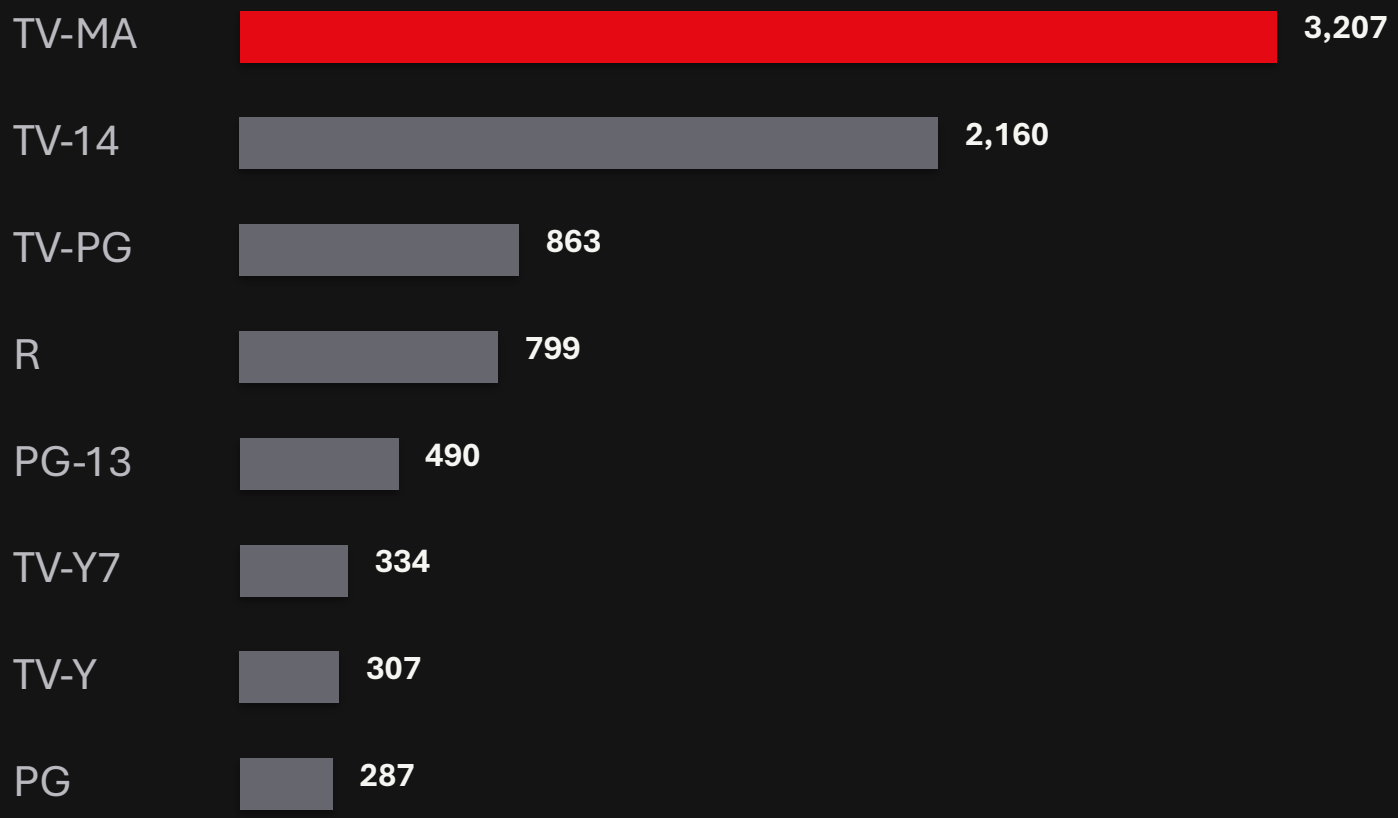

Movie-to-TV ratio: 2.29 : 1

69.6% movies

TV shows represent the remaining 30.4%. These are title counts, not viewing hours or audience demand.

Made with Julius

TV-MA and TV-14 dominate the rating distribution

5,367 titles

TV-MA and TV-14 together account for 60.9% of all reported titles.

Chart shows the eight largest rating categories.

Made with Julius

90 minutes is the most frequent listed movie runtime

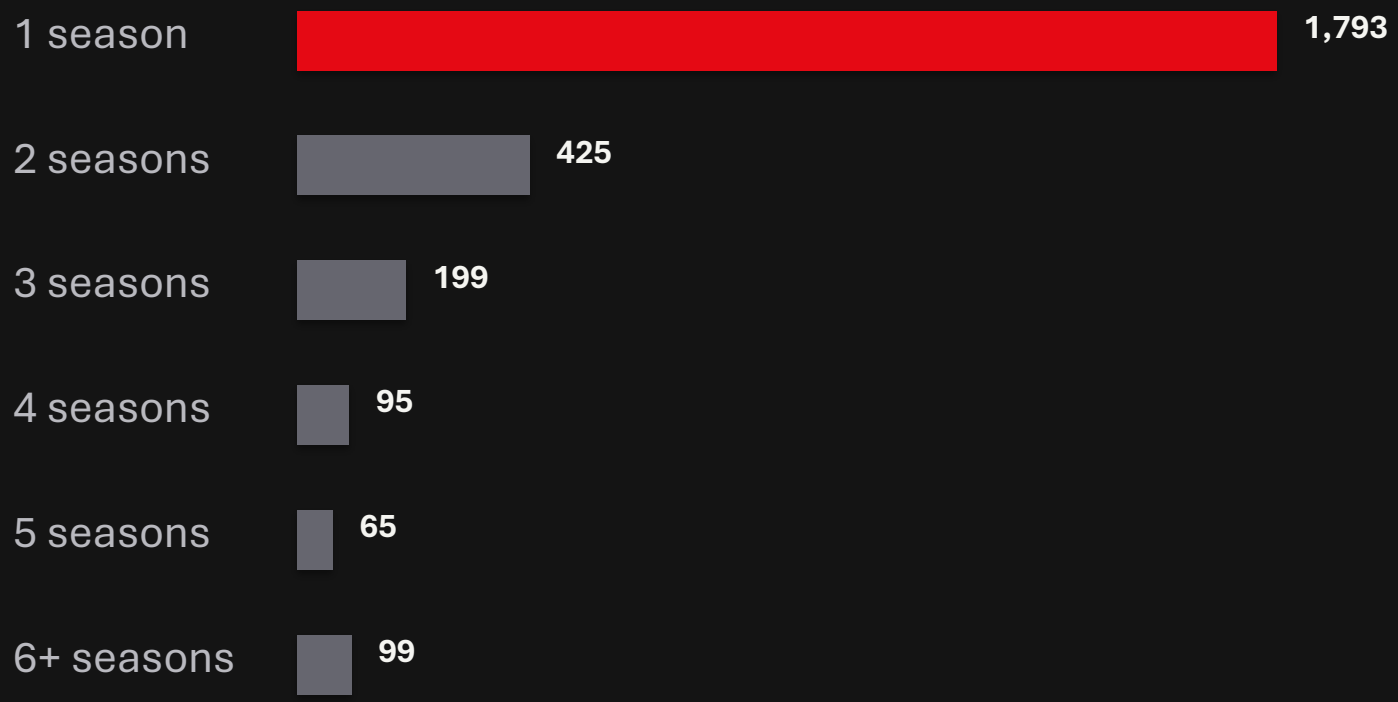

152 movies

90 minutes leads the ten reported runtime values.

These ten values cover 1,372 movies, or 22.4% of all movies.

Made with Julius

Two-thirds of TV shows have one season recorded

90.3% have 1–3 seasons

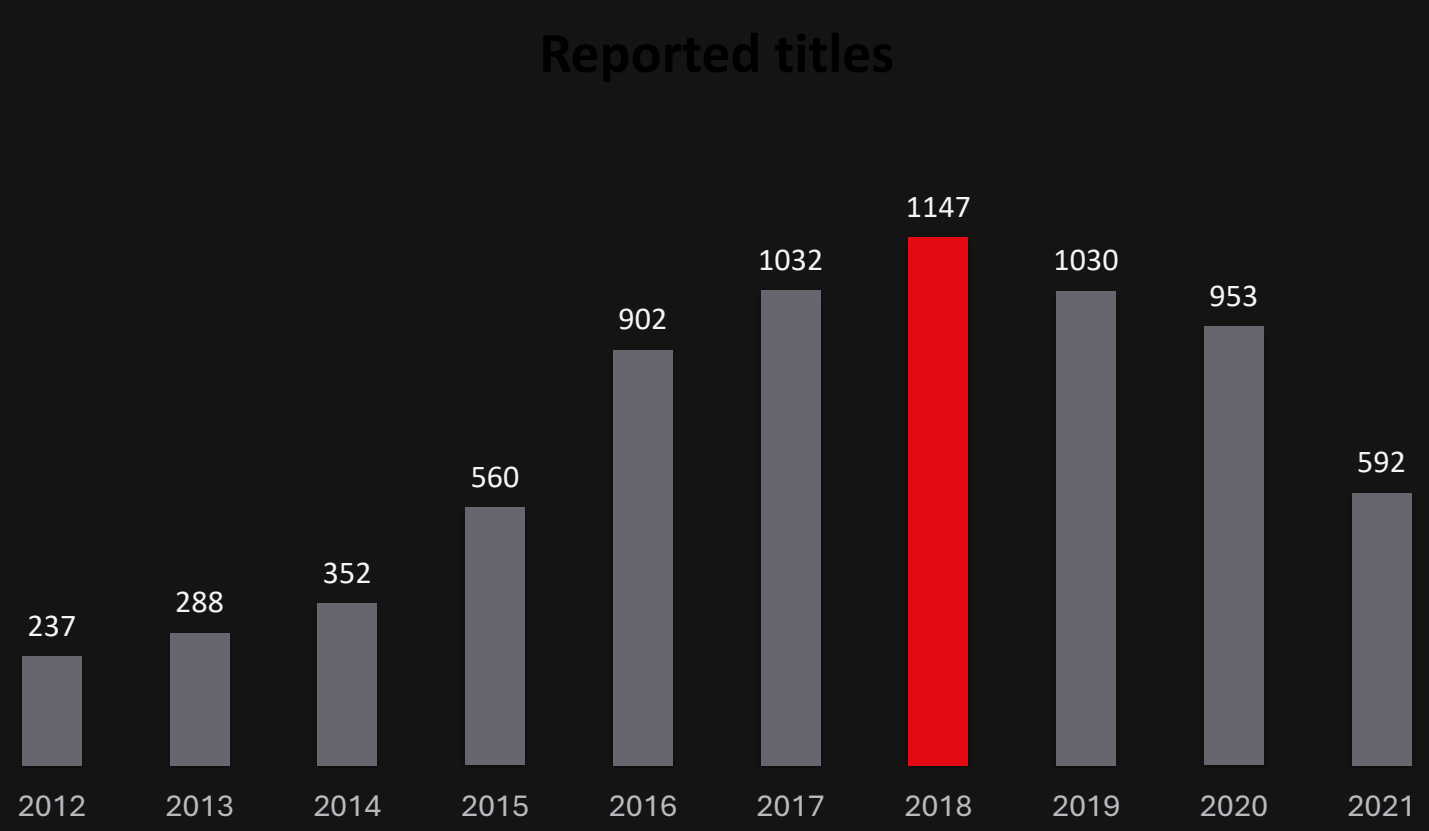

2,417 of 2,676 TV shows fall within the first three season counts.

Season counts describe the snapshot, not whether shows are complete.

6+ seasons combines all reported season counts from 6 to 17.

Made with Julius

2018 has the highest count in the reported year table

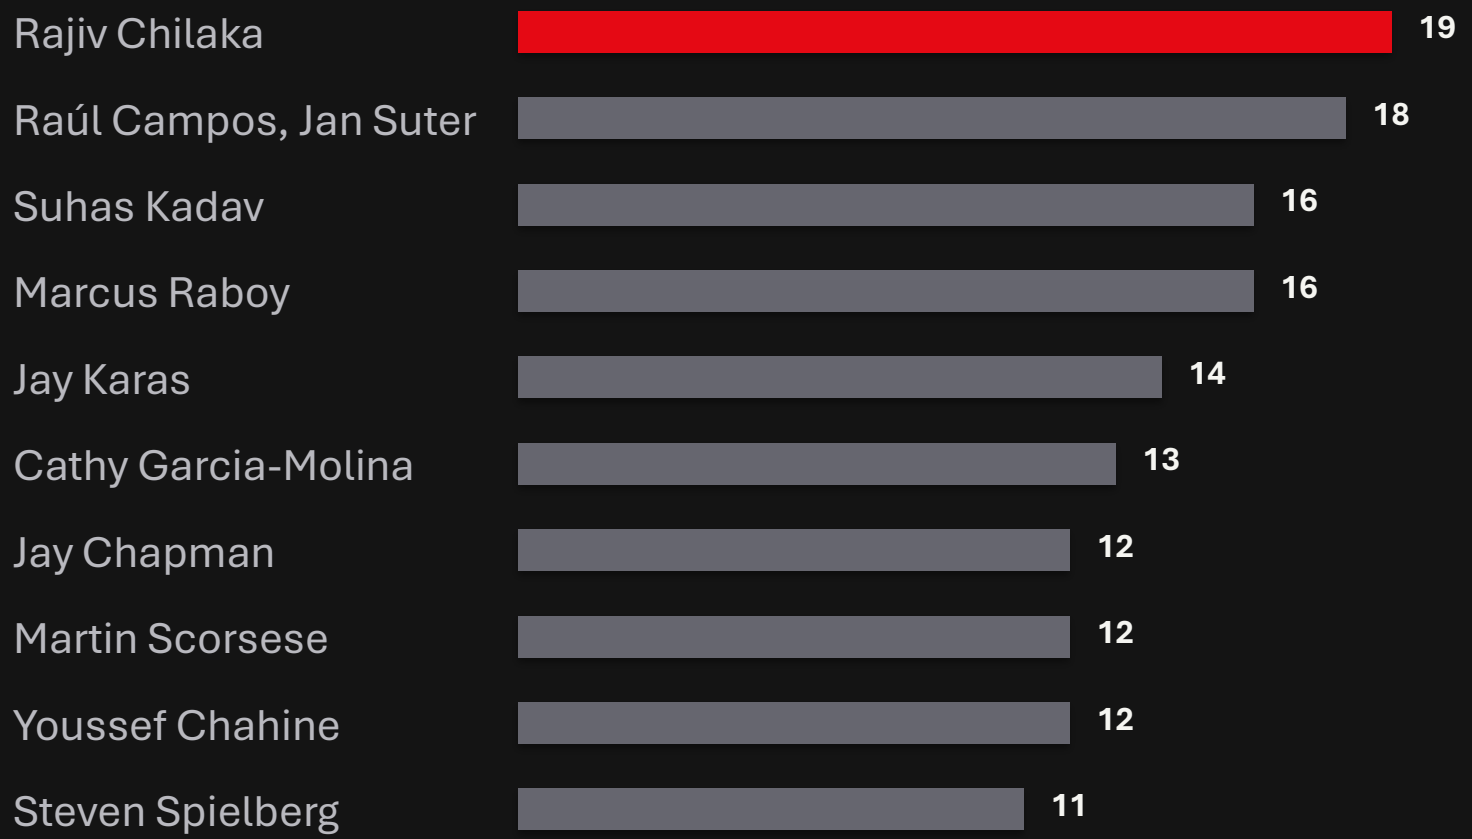

1,147 in 2018

The two PDF year tables contain identical values. They cannot independently establish release-year and date-added trends.

Made with Julius

Rajiv Chilaka leads the listed non-null director entries

29.9% missing

2,634 titles have a null director value.

The ranking excludes nulls and preserves joint director strings exactly as supplied.

 | Source: supplied PDF, pages 1–3. Calculations use the reported summary counts.

Made with Julius

The supplied violence label is not a verified safety measure

8,465

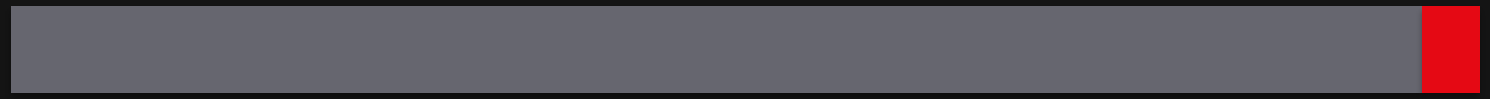

Labeled non-violence

96.1% of reported titles

342

Labeled violence

3.9% of reported titles

Interpret as a supplied classification only.
Do not equate “non-violence” with child-safe content.

Method not supplied

The PDF does not document the labeling rule, text fields used, validation, or classification accuracy.

Resolve the data issues before deeper analysis

01 **Ratings do not reconcile**

8,803 entries vs. 8,807 titles; three rating values are runtimes.

02 **Year labels are ambiguous**

Identical release/addition tables; 7,093 total exceeds the movie count.

03 **Metadata is incomplete**

2,634 null directors; snapshot date and market are unspecified.

04 **Classification is unvalidated**

Violence-label methodology and accuracy are not documented.

Next step: validate row-level data, dates, ratings, missingness, and labeling rules.

Scope & calculation notes

Source	User-supplied three-page Netflix summary; no row-level dataset was provided.
Denominators	Catalog: 8,807 titles. Movies: 6,131. TV shows: 2,676.
Percentages	Computed from supplied counts and rounded to one decimal place.
Coverage	Top runtime and director lists are partial summaries, not full distributions.
Interpretation	No current-catalog, audience-demand, causal, or verified content-safety claims.
Time window	The PDF reports 2012–2021; snapshot date and 2021 completeness are unknown.
